- This machine is developed only for Big Bag industry.
- Used for sewing the top and bottom panels of a big bag to main body and for sewing of baffle panels.
- Designed to create higher efficiency thanks to the higher rpm power (RPM 1800).
- It's suitable for both types of yarn, monofilament and multifilament between 1200 and 3000 deniers.
- The mechanism which gives movement to upper feed dog has been moved into the machine body in order to provide ease of movement for operator.
- Filler cords are standard from above and below.
- Proper for medium duty works.
- Smaller diameter spouts can be sewn comparing with similar machines.
- Heat cutting can be installed if required.
- Low spare part consumption.
